

Project team: Hadden Group (Tier 1), Anderson Bell Christie (Architect), TUV SUD (M&E) and Goodson (C&S).

“This is a fantastic new facility and I’d like to pay tribute to Hadden Group, the project team and hub East Central Scotland who have worked together to ensure the new health centre was completed on time and on budget.”

Mr Alex Linkston (Chairman NHS Forth Valley)

The purpose-built Doune Health Centre provides a modern, spacious environment for health and care services in a village with a growing population.

hub designed and constructed the upgraded facility, replacing the previous overcrowded provision. The single-storey building accommodates a wide range of services which support more joined-up care and speedier access for locals, including: GP practice rooms, physiotherapy, podiatry and counselling areas, and staff facilities.

The building scale complements the surrounding residential buildings with white render, glass and low-profile grey roof tiles, and fits well into its historic village setting.
