

Project team: Perth & Kinross Council (Client), Marshall Construction (Contractor), JM Architects (Architect), Hawthorne Boyle Partnerships Ltd (M&E engineers) and Morgan Sindall Professional Services (Engineers).

Project Information

The upgrade to an existing Grade-B building along with its modern extension creates an inspiring educational environment for pupils, along with exceptional nursery and community facilities.

We demolished several extensions that had been added to the original building, but now required a high level of maintenance and were inefficient in both layout and running costs. This made way for the extensive refurbishment and new build which is arranged around a courtyard setting. A vennel improves circulation between buildings, and keeps the education and community facilities separate.

The new classrooms have floor-to-ceiling windows, creating bright and modern learning spaces. A multi-use games area, courtyard, roof terrace and extensive playing fields offer fantastic physical activity and outdoor learning opportunities.

“Pupils, parents and staff are absolutely delighted with our fantastic new school! It provides an inspiring, positive learning environment which offers lots of opportunities to enhance teaching and learning within the classrooms and by using the many outdoor spaces available. It has been a pleasure and a privilege to have been involved in this project and the whole school community has a great sense of pride in our new school.”

Connie Letford (Headteacher)

Key statistics

- **VALUE:** £8.3m
- **COMPLETION DATE:** August & December 2017
- **COMMUNITY INVOLVEMENT:** Alyth School pupils were able to view the project from start to finish.
- **LOCAL EMPLOYEES:** 4
